Radisson Blu , Suhar

OQ RAM 2026 is a specialized industry platform focused on advancing Maintenance, Reliability, and Physical Asset Management through strategic thinking, operational excellence, and digital innovation.

Supporting Partner

Technical Collaborator

The conference highlights practical approaches to strengthening asset performance, enhancing organizational capability, and building a sustainable reliability culture. It brings together technical experts, leaders, and practitioners to share knowledge, showcase best practices, and explore emerging technologies shaping the future of asset-intensive industries. With a strong emphasis on collaboration and experience-sharing, RAM 2026 supports continuous improvement across strategy, people, processes, and technology.

Main Features of the Conference

Strategic insights into Maintenance, Reliability & Asset Management transformation.

Smart technologies, AI, and digital solutions shaping the future of asset performance.

Technical papers, real case studies, and success stories.

Practical approaches to improving reliability, efficiency, and sustainability.

Why Attend?

Insightful presentations
Gain knowledge from leading experts in the field

Interactive sessions
participate in activities and discussions

Networking opportunities
Connect with peers and industry leaders.

Cutting-edge topics
Explore the latest trends and technologies shaping the future.

Pre- Workshop & Keynote Speaker

"Beyond Maintenance: Achieving True Reliability & Operational Excellence – A Reliability & Operational Excellence Mastery Workshop"

To help organizations transform reliability from a maintenance initiative into a powerful business strategy that drives long-term operational excellence and sustainable competitive advantage.

Ron Moore, the internationally recognized authority in reliability, asset management, and operational excellence, with more than 30 years of experience helping industrial organizations improve plant performance, increase production capacity, and reduce operating and maintenance costs.

The Author of best-selling book "Making Common Sense Common Practice"

A highly respected speaker, and industry thought leader recognized globally for his practical, results-driven methodology.

Post Conference Workshop by:

The Society for Maintenance & Reliability Professionals (SMRP) is a leading global authority in advancing maintenance and reliability excellence. Bringing together industry experts, best practices, and internationally recognized certifications.
